
SUMMARY

As a Software developer, I'm specialized in writing quality code either starting a new project from scratch or getting into an existent one in the middle of the road.

I have good knowledge of front-end development process and hope to share my skills, expertise and experience with my team. I have strong analytical skills, which allow me to find decisions by consistent analysis of problems. Based on my technical education I hope to use my knowledge to perform any development activities

EMPLOYMENT

JUL 2020 -AUG 2021
